

# AMOS PRESS RELEASE

## AMOS NOW OPERATIONAL AT LUXAIR NOVEMBER 2010

### AMOS SUCCESSFULLY IMPLEMENTED AT LUXAIR

Swiss AviationSoftware (Swiss-AS) congratulates Luxair on its successful Go-Live with AMOS, the industry-leading MRO software made in Switzerland. The flag carrier went live with a big-bang approach and is now using the entire AMOS bundle with all modules for its complete fleet. The start of operation was followed by two weeks of onsite support provided by Swiss-AS' staff to ensure a smooth change-over in which the new AMOS users had adequate on-the-job support and a direct contact person in case of questions.

The biggest challenge that the project team had to face during the implementation was posed by the task of data mapping. For professional help regarding the data transfer process, Luxair relied on Régional Compagnie Aérienne Européenne (Air France Group) and CrossConsense (Swiss-AS' long-term partner regarding data transfer). Both companies have previously managed to successfully extract data from the same legacy system that has now been replaced with AMOS at Luxair. Due to the excellent cooperation and the vast combined wealth of knowledge and experience the data transfer was successfully managed and Luxair is now in possession of consistent and correct data.

A specific feature of the project at Luxair is the unique interface to the airline's warehouse management software, being part of a fully automatic random warehouse system that is now able to interact with AMOS.

Horst Lenhard, VP Technical Services of Luxair states: "Right from the beginning it was clear that AMOS was a perfect match for Luxair since we are convinced that AMOS will support us in the process of achieving a boost in efficiency while reducing costs in the maintenance sector."

"We are pleased to provide the Luxembourgian flag carrier with a state-of-the-art MRO software that is capable of covering every aspect of Luxair's operational business including its maintenance organisation" says Ronald Schaeuffele, CEO of Swiss-AS.

### ABOUT LUXAIR

Luxair Luxembourg Airlines is the national carrier of Luxembourg, being headquartered at the international airport of the capital. Luxair offers flights to 23 major cities in Europe, important business centres and international hubs. In addition to the scheduled flights, the flag carrier operates charter and seasonal summer flights.

The airline's mixed fleet consists of 16 aircraft of the types B737, ERJ 135, ERJ 145 and Q 400.

Luxair connects Luxembourg with other major European cities and is one of the country's largest employers. The entire fleet is maintained by the airline's own MRO organisation, performing Line and Base Maintenance (up to A Checks).

### ABOUT SWISS AVIATION SOFTWARE AND AMOS

AMOS is a fully integrated maintenance management system developed and distributed by Swiss AviationSoftware Ltd. As a 100% subsidiary of Swiss International Air Lines Ltd., Swiss-AS has become a fixture in the MRO software market and successfully sets standards in the MRO software industry. AMOS is the answer to the complex and cost intensive maintenance, engineering and logistics requirements of any modern airline and MRO provider.

Today, more than 90 customers from all over the world rely on AMOS and benefit from its continuously enlarged functionalities and technological cutting edge, which makes AMOS the industry-leading MRO software in Europe and one of the best-selling solutions worldwide.

Its solid customer base ranges from pure operators of all sizes, major low-cost, regional and flag carriers to large airline groups and MRO providers.
