

# Swiss-AS Press Release

## AMOS chosen by LOT Aircraft Maintenance Services October 2013

### Latest AMOS developments to be rolled out at LOTAMS

Swiss-AS is pleased to announce that LOT Aircraft Maintenance Services (LOTAMS) has chosen AMOS from Swiss AviationSoftware to fully track and control its maintenance operations and to gain a competitive edge by implementing this proven MRO system.

Shortly after the spin-off from the Polish national carrier, LOTAMS started its search for a modern M&E system with advanced MRO functions. During the pre-sales phase LOTAMS realised that AMOS' user-friendliness and extensive functionality would improve the company's efficiency and accordingly cut costs.

The implementation of the AMOS system is considered by the MRO provider as a major step in the process of restructuring the company's internal maintenance procedures.

"During the past months we have had major investments in the functional area for pure MRO providers. LOTAMS' engagement with Swiss-AS clearly indicates that we are moving in the right direction. Our efforts are already paying off in terms of a broader and deeper functionality for customers who are MRO providers," states Ronald Schaeuffele, CEO of Swiss-AS.

Pawel Gontarczyk, LOTAMS Board Member, says: "The most important role of Swiss-AS in AMOS system implementation project is guiding and assisting LOTAMS in streamlining and changing current maintenance and engineering procedures in order to develop and implement future state-of-the-art business processes. AMOS is an enabler to achieve the company's goal."

Swiss-AS is confident to guide LOTAMS smoothly towards go-live due to the highly standardised implementation process which is optimised and fine-tuned with each AMOS project.

### About LOT Aircraft Maintenance Services (LOTAMS)

LOTAMS is an independent MRO provider, based in Warsaw, Poland. Until 2010, LOTAMS used to be the Technical Base of LOT Polish Airlines. Today LOTAMS acts as an individual MRO entity on the 3rd party operators market. As full-scale aircraft service provider, LOTAMS offers maintenance for the most popular aircraft types: B737, B767, B787, ERJ 170/190, A320, Q400-8, EMB 145, ATR 42/72, repair, overhaul and modification services for civil aviation fleets and government agencies. Under special contracts, LOTAMS offers also other advanced services including CAM and engineering consulting services. Moreover LOTAMS is the Embraer's Authorized Service Center servicing all types of ERJ fleets. Apart from providing MRO and engineering services to LOT Polish Airlines, LOTAMS offers MRO services to many other airlines/companies in and outside Europe. Its market share increases due to its highly qualified and skilled staff who make LOTAMS a trustworthy partner in the MRO service business.

### About Swiss AviationSoftware and AMOS

AMOS - developed and distributed by Swiss AviationSoftware - is a comprehensive, fully-integrated software package that successfully manages the maintenance, engineering and logistics requirements of modern airlines and MRO providers by fulfilling all airworthiness standards. Swiss-AS is a 100% subsidiary of Swiss International Air Lines Ltd., and has almost 120 customers worldwide. This loyal customer base includes pure operators of all sizes, major low-cost, regional and flag carriers, large airline groups and MRO providers. The fact that none have ever replaced AMOS with an alternate system speaks for itself. Swiss-AS is an industry-leading MRO software provider and their AMOS product is one of the bestselling solutions worldwide. Swiss-AS has its headquarters in Basel, Switzerland and is also represented in Miami, USA and Singapore.
