

# Swiss-AS Press Release

## AMOS now operational at LOTAMS

### October 2015

#### At a glance

- Smooth go-live with AMOS version 10.70
- "Big bang" approach
- Tight timeline due to internal reorganisation at LOTAMS

#### All maintenance activities are now controlled by and with AMOS

Swiss-AS is delighted to announce the go-live of AMOS at Polish MRO service provider LOT Aircraft Maintenance Services (LOTAMS).

Shortly after the spin-off from the Polish national carrier, LOTAMS started the implementation of AMOS as an initiative to modernise its maintenance IT landscape.

"Congratulations to LOTAMS on the recent go-live with AMOS, a milestone to sharpen LOTAMS' strategy in operating with state-of-the-art business processes and a big gain for the AMOS community," says Ronald Schaeuffele, CEO of Swiss-AS.

#### Smooth "big bang" approach

One characteristic of the project was the tight completion deadline linked to the simultaneous and extensive restructuring process within LOTAMS.

The project successfully culminated in a go-live via the "big bang" approach, meaning that all AMOS modules were simultaneously put into operation and from that moment onwards, all activities were controlled by AMOS. The technical staff made immediate use of their acquired AMOS knowledge when the first aircraft completely managed in AMOS arrived from Australia at the LOTAMS premises in Warsaw on the same day as the go-live.

#### About LOT Aircraft Maintenance Services (LOTAMS)

LOTAMS is an independent MRO provider, based in Warsaw, Poland. Until 2010, LOTAMS was the Technical Base of LOT Polish Airlines. Today LOTAMS acts as an individual MRO entity on the 3rd party market.

As full-scale aircraft service provider, LOTAMS offers maintenance for the most popular aircraft types: B737, B767, B787, ERJ 170/190, A320, Q400-8, EMB 145, ATR 42/72, repair, overhaul and modification services for civil aviation fleets and government agencies.

In addition to providing MRO and engineering services to LOT Polish Airlines, LOTAMS offers MRO services to many other airlines/companies in Europe and worldwide.

#### About Swiss AviationSoftware and AMOS

AMOS is a comprehensive, fully-integrated MRO software solution being developed and distributed by Swiss AviationSoftware. Swiss-AS, a 100% subsidiary of Swiss International Air Lines, has almost 140 customers worldwide and belongs to the industry-leading MRO software providers. Our loyal customer base includes pure operators of all sizes, major low-cost, regional and flag carriers, large airline groups and MRO providers. "The smooth implementation of the new integrated system AMOS at LOTAMS constitutes an undeniable milestone in the development of our company. It was possible thanks to the strong commitment of the whole LOTAMS team starting from the new definition of business processes and procedures, and ending with the current implementation of the results and its verification by IT professionals. We are also very satisfied with the level of support and cooperation of the Swiss-AS consultants during migration. In the widespread opinion of the company's Board, executives and LOTAMS' employees, who are directly involved in aircraft MRO, AMOS is our real new window to the world of the third party customers for today and for the future," states Bozena Bolek, Director IT Bureau at LOTAMS.
