Swiss-AS Press Release
AMOSmobile early bird customers
January 2016

Swiss-AS AMOSmobile

A dedicated AMOSmobile core team focuses on the development of the Swiss-AS mobile solution. The development method is agile, feature focused and customer driven to produce within short development cycles valuable functioning software for the benefit of the end-users.

At the end of 2014, we invited customers for a workshop in Basel to define the functional scope of the first AMOSmobile suite which will cover maintenance execution processes. This resulted in the launch of the AMOSmobile module "EXEC" (which stands for execution) in November 2015 at the AMOS Customer Conference in Lucerne, Switzerland.

Convinced that a close cooperation with members of the AMOS community can only be beneficial for the application, we decided to offer the AMOSmobile/EXEC module at an incentive price to a limited number of customers who are ready to extensively test this mobile solution and help Swiss-AS to complete and fine-tune the first AMOSmobile module.

AMOSmobile early bird customers

We are happy and proud to reveal that Pegasus Airlines and UTair decided to support us in this process. Both parties will be heavily involved in the future development of AMOSmobile/EXEC.

Pegasus Airlines is a Turkish low-cost airline based at the Sibuha Gökçen airport in Istanbul that operates a fleet of 57 aircraft. UTair is a Russian airline with its head office at Khanty-Mansiysk Airport, operating scheduled domestic and international passenger services,

With the in-the field experience of these two customers, Swiss-AS is confident to soon complete AMOSmobile/EXEC.

The benefits of AMOSmobile

- Mobile
- Paperless
- Faster access to data
- Real time feedback
- E-signature
- Easy access to interactive manuals, diagrams, 3D graphics,
- Context sensitive search, links, details, etc.
- High data quality due to templates, input validation, autocomplete functions, etc.

AMOSmobile represents a unique opportunity for customers to streamline their maintenance processes due to the location-independent access of data.

AMOSmobile roadmap

The AMOSmobile development team, after having incorporated the outcome of the workshop, currently continues to add new functions to the mobile suite including more Workorder features, Store features, Workpackage functionalities, Structural Damage functions and other miscellaneous topics (approval control, audits, report, etc.).

About Swiss AviationSoftware and AMOS

AMOS is a comprehensive, fully-integrated MRO software solution being developed and distributed by Swiss AviationSoftware. Swiss-AS, a 100% subsidiary of Swiss International Air Lines, has more than 130 customers worldwide and belongs to the industry-leading MRO software providers. Our loyal customer base includes pure operators of all sizes, major low-cost, regional and flag carriers, large airline groups and MRO providers.
