- Leisure carrier Small Planet Airlines chooses AMOS
- Project kick-off already in December 2015
- Implementation of AMOS Essentials

Small Planet Airlines decides for AMOS

After a short and concise evaluation process, Small Planet Airlines has decided to go for AMOS. Before signing contracts with Swiss-AS, Small Planet Airlines had already set-up an internal dedicated project team and the necessary IT infrastructure ready to welcome the project manager of Swiss-AS for the first kick-off meeting held mid of December. Both parties are confident that strong commitment on both sides will result in an early return on investment,

AMOS Essentials to fit for Small Planet Airlines

"We are very proud of this new agreement as it shows once again how AMOS can be flexible and adapted for the needs of small airlines as well as for big MRO providers" states Ronald Schaeuffele, CEO of Swiss-AS.

Indeed, Small Planet Airlines has selected the AMOS Essentials Edition for managing its full fleet of 18 Airbus A320 aircraft. This dedicated AMOS package consists of all high-end AMOS core modules and is offered with a tailored training and implementation plan including project management, consulting and data transfer support. The offer is a high quality implementation package at a favourable price which is the most efficient solution for smaller organisations.

Thanks to a strong and committed project team at Small Planet Airlines, the AMOS Go-Live is already planned for 30th of June 2016.

About Small Planet Airlines

Small Planet Airlines is a leisure airline that operates 18 Airbus A320 aircraft in the markets of the Great Britain, Germany, Poland, Lithuania and Italy. Small Planet Airlines offers full charter programs, aircraft wet lease service and ad-hoc flights. Small Planet Airlines cooperates with major tour operators carrying their passengers to mainstream holiday destinations in Greece, Spain, Turkey, Egypt and other countries during the summer season (May-October) each year. During the winter, the company shifts some of its aircraft to Asia and other regions to balance the seasonality. In 2014, Small Planet Airlines has transported 1.25 million passengers.

About Swiss AviationSoftware and AMOS

AMOS is a comprehensive, fully-integrated MRO software solution being developed and distributed by Swiss AviationSoftware. Swiss-AS, a 100% subsidiary of Swiss International Air Lines has more than 140 customers worldwide and belongs to the industry-leading MRO software providers. Our loyal customer base includes pure operators of all sizes, major low-cost, regional and flag carriers, large airline groups and MRO providers. In the Americas and in Asia, AMOS is distributed through a partnership with Lufthansa Systems. For more information, please contact us via marketing@swiss-as.com or visit us at

"The challenge of having several AOCs and subsidiaries in many European countries and spreading into Asia makes this short and lean AMOS implementation rather unique. I feel confident that AMOS will support all future needs of our growing airline as we move towards new destinations, not only for our flights, but also in the scope of our undertaking." said Erich Ceru, CTO of Small Planet Airlines Group.
